Nowshin Alam is an Assistant Professor of the department of Electrical and Electronic Engineering, American International University-Bangladesh since 2018. She received her Bachelor of Science degree in Electrical and Electronic Engineering from Bangladesh University of Engineering and Technology (BUET) and Master of Science degree in Electrical Engineering from University of California, Riverside (UCR), in year 2014 and 2016 respectively. She started her career as a System Engineer at Huawei Technologies Ltd., Bangladesh since September 2014 and served there till April 2016. She joined academia after getting her MSc degree and briefly worked at Green University, Dhaka as a lecturer in Electrical Engineering from May 2018 to August 2018.
Her research interest includes Wireless Communications, Signal Processing, Solar Cell Design, Machine Learning and Antenna Propagation. In her free time, she likes to write articles and create youtube videos on efficient online teaching, increasing productivity through automation and programming, and applying technological approaches to education.

Md. Abdur Rahman is faculty member of the faculty of engineering since 2002 at American International University-Bangladesh (AIUB). Currently he is employed as Professor and Associate Dean of the Faculty of Engineering in the same university. He received PhD in wireless communications from Tokyo Institute of Technology, Japan in 2013. He received BSc Engg. and M.E. degrees from American International University Bangladesh (AIUB) and Asian Institute of Technology (AIT), Thailand, respectively in 2002 and 2006. His recent research interests include cognitive radio, bioinformatics, wireless systems, ICT etc. He conducted postdoctoral research in the School of Engg. and IT at Federation University Australia on Bio-informatics. He is a Life member of IEB and senior member of IEEE. During his doctoral studies he lead a team of students formed by both undergraduate and postgraduate students for designing an emergency wireless network. The team took part in four international research competitions and won four prizes including Wireless Innovation Smart Radio Challenge, IEEE president's change the world outstanding humanitarian award, IEEE DSPS best student presentation and IEEE Tokyotech Best Paper award. Currently he is residing in Dhaka, Bangladesh and working on the improvement of teaching learning methods along with innovative engineering projects.
